FOLLOW UP:
Urgent Allergy Advice: Mustard Ingredients Contaminated with Peanuts

Good Afternoon

I wanted to follow up on our communication yesterday, regarding the recent allergy advice from the FSA surrounding the Mustard Ingredients Contaminated with Peanuts.

In terms of Olive dining's response, we have checked our products and can confirm that there is no risk surrounding these and they are not on the list of items affected.

However, to ensure the safety of our customers we have removed all mustard products from our buying list effective immediately.

A communication has been sent to our Managers to advise them of this and the alternative products we have made available for them, we have asked that the managers discard any opened products containing mustard and isolate any unopened product until we confirm they are safe to use or the need to discard.

We understand the importance of keeping our customers safe and so are taking every precaution to do so.

If you have any further questions or queries, please do reach out.

Many thanks

Caroline Whyman
Director of Operations
